A c. 1820s antique Laennec monaural stethoscope turned in three parts from cedar. The insert cone of cedar and brass was used when listening to heart and voice sounds. Rene Theophile Hyacinthe Laennec (1781-1826) invented the stethoscope around 1816.
Why the abdomen?

In Italian an aphorism says:

“L’addome è la tomba del medico e il monumento del chirurgo”

“The abdomen is the grave of the physician and the monument of the surgeon”
.... and the abdomen is full of organs !!!!!

• Liver
• Spleen
• Kidney
• Bladder
• Bowel
• Vessels
• ..........

..... moreover neonatologists like to put tubes, catheters and other devices everywhere.
Aorta, Portal System, Renal Vessels ....
